## The Positive Power of Pop Art

With an emphasis on social emotional learning, students will explore how to convey emotion and positivity through pop art images. Students will explore their creativity through mixed media and learn how to symbolize a positive message through the power of color, words and images.

Guided by our talented instructors, participants will learn about the elements and principals of art and design while creating a multimedia assemblage utilizing pop art as inspiration. Students will experiment with various art mediums including cellophane sculpture, decoupage, collage, oil pastel, marker, colored pencil and watercolor in completing this multi-step process.
